

Department of English deploys student centric teaching methods such as experiential learning, participative learning to enhance learning experiences. The biggest challenge for any teacher is capturing each student's attention and conveying ideas effectively enough to create a long-lasting impression. To tackle this challenge effectively, the teachers implement innovative ideas that make the learning experience much more interesting for the students

1. Lecture based teaching: Teacher educators teach through a lecture cum discussion method in class so that students can enhance their learning by contributing their thoughts and knowledge in the class. In the discussion sessions students are the active members of the class environment and they are monitored by the teacher facilitating an aura of a healthy discussion.

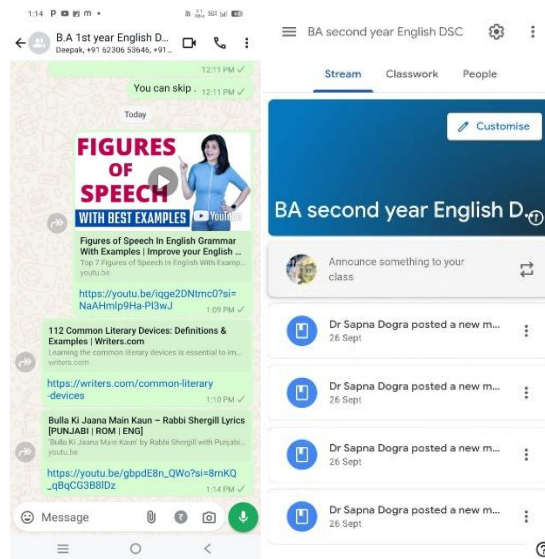

2. Technology based learning: Use of Smart Boards, use of WhatsApp groups, sharing of e-resources with students, sharing different links with students. All these efforts are made by teachers to enhance learning of the students.

3. Flipped classrooms: other virtual platforms like Google Classroom, YouTube, Whatsapp, have helped to incorporate the model of flipped classroom and blended learning. The faculty members along with the regular lecture method use Google Classroom where

study material is uploaded from time to time. WhatsApp groups are created for each batch in which films, videos and other learning material is shared for discussion.

4. Need-based Learning: To cater the diverse learning needs of the students, our department adopts various strategies such as special classes, remedial teaching, collaborative learning, special coaching in communicative English.
